More Lights Needed

Editor Recorder:

I note in the last issue of the Recorder your article re street lights, and wish to say that I agree with you, that we should have more light.

I have before me a book written by the Dominion Government giving an accurate description of all of Canada's lighting systems, including rates, hours of service, etc., and I find that our rate for lighting, 14c. per k. w. h., is the cheapest, with one or two exceptions, of any town of Raymond's population, in the entire Dominion.

Our rates for street lighting is also one of the cheapest and, unfortunately, one of the poorest, because we haven't enough lights.

I would like to suggest as an improvement, not as a means for getting revenue for the Raymond Electric company, but for the general appearance, safety and brightness of our town, that in the main travelled parts we have a lamp on every pole, and in the outlying streets a lamp at each street intersection and one in the center of the block.

There are some people who blame the Raymond Electric company for not replacing burnt-out street lamps. I wish to say for their information that it is the duty of the Town to make these replacements, and it should be attended to promptly instead of neglecting it for months, as I know to be true in some cases. These lights have to be paid for whether they burn or not.

I thank you for the space in your valuable paper, and trust that the Town Council will some day look at Raymond more "brightly."

R. W. Tollestrup.

Card of Thanks

We desire to express sincere thanks to the many kind neighbors and other friends who gave us prompt and active assistance in extinguishing the fire which threatened to burn our residence last week.

Harry Jones Wins Cup

Harry A. Jones is the proud holder of a handsome cup which he won at the Lethbridge Poultry show for best pen of cock and five hens. If he wins this cup twice more in succession he will become its permanent possessor. He also won first for hen, and second for utility pen.

Grand Carnival Next Friday and Saturday

Miss Eva Dahl - 4000 votes
Miss Stella King - 4300 votes
Miss Mary Redd - 4400 votes
Miss Jean Kimball - 3400 votes

The above are the candidates in the Popular Lady Contest being held in connection with the Grand Harvest Carnival to be held next Friday and Saturday, Dec. 4th and 5th, for the benefit of the Raymond First Ward. This big two-day celebration will undoubtedly receive the hearty support of all Raymond citizens as the cause is worthy and deserving.

The Carnival will present an appearance of beauty and gaiety, with special decorations and lighting effects. There will be a number of fish ponds and booths where pretty girls in costumes will sell delicacies, confections, notions and novelties of all kinds.

There will be a grand banquet Friday evening at 6 o'clock, and both evenings will see special dances in progress at which many special features will be introduced.

A dance for children will be held Saturday afternoon at 4 o'clock.

On Saturday night the ballots will be counted and Raymond's most popular lady will be declared.

All are invited to join hands in making the Grand Harvest Carnival the most enjoyable event in Raymond's history.

Will Leave on a Mission

Elder J. U. Allred will soon leave on a mission. He will probably be called to Winnipeg where his brother, J. G., is mission president. Elder Allred goes from the Raymond first ward.

NEWS NOTES

The nation mourns the death of Queen mother Alexandra, widow of King Edward VII, who died on Friday afternoon.

Mrs. Geo. Mangan, who has been visiting her mother, Mrs. A. Corless, for the past month, left on Tuesday to join her husband in Roseburg, Ore.

Born—To Mr. and Mrs. Geo. D. O'Brien a daughter.

Mr. and Mrs. Josiah Holland are moving to Raymond for the winter.—Cardston News.

When a man feathers his own nest there are usually several plucked chickens standing around mournfully thinking it over.

Boxing Matches

Were Good

Jack Feland, unable to hurt his heavier opponent, Jimmie Mahon, the Lethbridge bruiser, clinched and ducked his way through the full twelve rounds of the boxing match last Wednesday night without any serious injuries to himself.

Mahan carried the fight through out but seemed unable to score any telling blows through Feland's clever defense, although in the last round his rushing style and a few punches landed on Feland's neck evidently left the latter a trifle dazed. Aside from this round all blows struck were harmless or well blocked. The match was easily Mahan's.

The referee, Ben Cardwell, called the Feland-Mahan bout a draw.

The 3 round go between Brady Brooks, tailor at Yarr's and Wm. Lamar, butcher at Holt's, was the cream of the evening. These boys mixed it thoroughly, and, although the little tailor was much too fast for the butcher and had him long for the end of the third round, it was a thrilling match from start to finish.

W. Hague and Jack Glover also furnished a good 3 rounds, while kids, Melchior and Buhler contributed their full share to the evening's show.

The crowd was somewhat undisciplined. Several ladies were numbered among the spectators.

Cultivate the Christmas Spirit Now

The approach of the Christmas season brings to nearly everybody thrills of pleasurable anticipation. It is a time of happiness and goodwill all round when old disappointments, and enmities, and selfishness are relegated to the background. Already people are busy planning and making gifts for relatives and friends, and it is to be hoped, with a thought for those who are less fortunate than themselves.

But there are certain groups in our population to whom the coming of Christmas means the hardest work and longest hours of labor during the whole year. Chief in this group are the employees of the post office throughout the country. Persons who seldom write to relatives and friends throughout the year, do so at Christmas time. Millions exchange Christmas cards and other forms of greeting. Parcels containing gifts pour into the post offices in their thousands. And the postal employees have to receive, sort and dispatch it all, and in the cities and along rural routes, deliver it.

Most people think the mailing of their cards of greeting and gifts so they will arrive at their destination one or two days before Christmas, or possibly on Christmas Day itself. The inevitable result is such a congestion in the post offices and railway mail cars that it is a physical impossibility to handle all the business within the short space of time before Christmas Day, no matter how tremendous an effort is made by the postal clerks. Thus many gifts intended for Christmas are not received by those to whom they are addressed until Christmas is past and gone for another year.

A little more planning, and forethought, and unselfishness in behalf of the post office staff, displayed by people generally, would greatly improve this condition. By mailing Christmas gifts well in advance it may be that they will be received some days before Christmas, but, even so, is there not a greater thrill in the arrival of the first gift than in the case of subsequent ones? And is not a gift received before Christmas a happier one than if it is delayed and not received until Christmas and its festivities are past?

Another group who find the week preceding Christmas a time of strain, resulting in ragged nerves and sharp tempers, are the clerks in stores. Many of them after the strenuous pre-Christmas rush find it necessary to recuperate in bed instead of being able to enjoy and join with others in the joy of the day. Their lot can be made much easier by early shopping. Therefore, in your Christmas shopping, give a thought to their comfort and happiness.

In order to be in a position to deliver your Christmas parcels early, it is necessary to shop early. Thus both these groups of workers will be helped to give you and the public generally better and more efficient service. Just a word in season—adding your Christmas unselfishness into action well in advance of Christmas Day.

You stand to gain by it in every way. Remember the old saying: "The early bird catches the worm." Well, early shopping means that you have the pick of the goods offered for sale, while the late shopper has to be content with what is left over and previously rejected by the more alert and discriminating shopper. Early shopping gives time for suitable selection of gifts best designed to meet the needs and cater to the tastes of the one for whom they are intended. It means leisure in getting them suitably inscribed with appropriate messages and neatly and properly packed. And an attractively tied or packed parcel adds much to the pleasure of the one who receives it. It conveys an impression of thought and real love on the part of the sender.

Finally, in mailing, observe the instructions of the post office authorities. Put the postage stamp in the upper right hand corner; the address in the lower right hand corner; place your own name and address as sender in the upper left hand corner; if the parcel contains fragile articles, mark it holdly, "Handle with Care" or "Fragile." If you are attaching any Christmas seals or stamps of greeting, place them on the back of the letter or parcel, but not on the same side with the address and postage stamps.

General observance of these little things will greatly expedite the handling of the Christmas rush of mail matter, insure the proper handling of your parcel, and by speeding up the whole service and lightening the labor of the postal employees result in what you yourself desire, the best possible service.

"Please, mum, the stove's gone out."
"No, Nora, you don't mean the stove. You mean the fire's out."
"Indeed I don't. The instantaneous men just came and got the range!"

A Massachusetts farmer in 1790 spent only \$7 to maintain his family and operate his farm; all other essentials having been made on the farm.

CHILDREN CRY FOR

**Fletcher's
CASTORIA**
MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Charles H. Fletcher*. Absolutely harmless—No Opiates. Physicians everywhere recommend it.

New Types Of Aeroplanes

British Government Has One That Can Be Converted Into a Yacht
A French engineer M. de Monge, has invented a new type of aeroplane, which can be driven by ordinary automobile engines. The plane has no fuselage body. The ailerons, tail, and rudder are attached to the front wing by steel rods only, and the pilot and passenger sit in a kind of cockpit in the centre of the wing between the two nine horsepower engines that are used. The plane is of course much lighter than the usual type, and it is said that it can be stored with fuel enough for a flight of nearly 3,000 miles. The engines burn only a gallon of gasoline for every thirty miles of flight, and drive the plane easily at a hundred miles an hour. The British Government has built another experimental aeroplane which has light masts and sails in addition to its aerial equipment. When it has to come down into water the sails can be spread and the plane converted into a neat little yacht! The plane is all metal, and a German engineer, Rohrbach by name, is said to have designed it.—Youth's Companion.

"DIAMOND DYES"

COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything! Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Holds Record For Speed Violations
If Marlon B. Shaw, who holds all records for speed violations, breaks any more traffic laws or again refers to policemen as "lick cops," his husband is likely to go to jail, under a novel ruling against him by a judge in New York. Mrs. Shaw has been summoned for speeding 53 times and escaped when chased by motorcycle policemen 27 times. In 1923 she was fined \$25 for calling a policeman a "lick cop."

HOW TO RELIEVE CHILDREN'S COLDS

Avoid Serious Results by Using Baby's Own Tablets

When a child shows the first symptoms of a cold, such as sneezing, redness of the eyes, clogged or running nose, prompt measures for relief may avert serious results. Mothers should always have on hand some simple, safe and effective remedy for immediate use.

Baby's Own Tablets act quickly, contain no opiates or narcotics, are tasteless and harmless. Mrs. Joseph Cadieux, Holyoke, Mass., says: "I have used Baby's Own Tablets for my children and find them a very satisfactory medicine. When my little boy had a cold I gave him the Tablets at night and he was well next day. I give them to the children for constipation and they always do good. I think Baby's Own Tablets are much easier to give a child than liquid medicine. I recommend the Tablets to all mothers who have small children and believe they should always be kept on hand."

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Entertain In London

Hon. P. C. Larkin and Mrs. Larkin Receive Notables at Dinner Party

Hon. P. C. Larkin, Canadian high commissioner in London, and Mrs. Larkin gave a dinner party recently at their residence at Lancaster Gate. Among the guests were: Hon. Alanson B. Houghton, United States ambassador to Great Britain, and Mrs. Houghton; Rudyard Kipling and Mrs. Kipling; Right Hon. J. H. Whitley, speaker of the House of Commons, and Mrs. Whitley; Hon. J. MacNeill, high commissioner for the Irish Free State in London; and Mrs. MacNeill; Right Hon. Austen Chamberlain, British foreign secretary, and Mrs. Chamberlain.

A man who looks only at one side of a thing imagines that every other man does the same thing.

Man is the animal that uses a cook book and employs a physician.

VAPORUB**
Over 21 Million Jars Used Yearly

No Trouble To Make Payment

Danish Settlers Pay \$2,000 On Purchase Price of Farm

"You want us to make a payment on the farm now."

"Yes, that is the usual way of handling land deals of this kind," said the smiling land agent.

"All right, we'll give you some now," and without any more ado the purchaser reached among the matches and street car tickets in his vest pocket and brought out two little wads of paper which he laid on the desk.

These little wads of paper were one thousand dollar bills.

This little scene took place in the office of the Western Colonization Company in Saskatoon. The thousand dollar bills were paid over by two Danish farmers who were brought out to this country to take up land, and who purchased a section twelve miles from Saskatoon. The agent was Alex. Perspersen, a former Danish immigrant.

She Could Hardly Do Her Housework Nerves Were So Bad

Mrs. I. M. Parks, Concession, Ont., writes: "I had back and nerve trouble, and became so short of breath I could hardly do my daily housework, and was so nervous I could not think of staying alone, as every little sound I heard felt like a shock to me."

I Saw
recommended, so I tried a box, and after taking the second one I am now feeling like a different woman."

This preparation has been on the market for the past 32 years and has achieved a wonderful reputation for the relief of all heart and nerve troubles.

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Marjorie: "Dorothy is not very clever, is she? The cakes she served at yesterday's tea were as hard as rocks."

Anita: "You bet she's clever; her husband's a dentist!"

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Biting phrases are never very pleasant. They are particularly unpleasant when uttered by a toothless cynic.

There is an obelisk in Egypt that has never been raised. It weighs 1,168 tons.

SUNDAY SCHOOL LESSON

NOVEMBER 22

PAUL BEFORE FELIX

Golden Text: Herod I also excused myself to have a conscience void of offense toward God and men always. Acts 24:16.

Lesson: Acts 23:1-24:27.

Devotional Reading: Psalm 86:11-17.

The Text Explained and Illumined

The Case Against Paul Presented by Tertullus, verses 1-9.—See The Historical Background. Lysias had charged Paul's accusers to appear against him before Felix. Within five days the high priest Annas with a deputation from the Sanhedrin arrived in Caesarea. Paul was summoned for trial. Tertullus, the advocate whom the Jews had engaged, presented their case against him. After fulsome words of flattery for Felix, even expressing gratitude for his reforms, Tertullus accused "this pestilential fellow" of three things: inciting disturbances among the Jews throughout the Roman Empire—an offense against the Roman law; being the leader of the sect of the Nazarenes—an offense against the law of Moses; and defiling the temple—an offense against both the law of Moses and the Roman law, since the latter protected the Jews in their worship. When Tertullus concluded his speech, the deputation of Jews emphatically endorsed all that he had said.

"We all abhor flattery unless it be to us or from us, and then we call it by another name" (John A. Shedd).

Radium Clock Should Run Indefinitely

Nearest Approach to Perpetual Motion Say Scientists

Perpetual motion has been a long sought goal, and while many ingenious devices have resulted from efforts along this line, all have failed to prove practicable. But recently there has been invented a device which, while not a timepiece, is called a "clock," which scientists declare should run indefinitely. This is known as the "radium clock." As its name suggests, the motive force of the radium clock is atomic energy.

There is no poisonous ingredient in Holloway's Corn Remover, and it can be used without danger or injury.

Got Radium Instead Of Radio Parts

Woman Accepted \$25,000 Package Thinking It Was Her Order

Fifty thousand dollars worth of radium went astray because the King's County Hospital, No. 1018, turned a new ambulance driver just when Mrs. Charles L. Feltman, of Brooklyn, expected a package of radio parts from a store. The similarity of the words radio and radium caused all the trouble.

Beside Mrs. Feltman's house is the home and radium hospital of Dr. Chester Ford Duryea. Dr. Duryea had used his radium at the hospital and it was to be returned, according to custom, under guard in an ambulance.

The new driver supposed Dr. Duryea lived next door to his radium hospital and left the package there. When Dr. Duryea arrived home he called the hospital and was told the radium was delivered.

Six hours later, the driver, off duty, was found and explained Mrs. Feltman had taken the package from the maid, believing it contained radio parts. She had not opened it.

Nation-wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Electric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Report Good Sockeye Run

Reports received by the department of Marine and Fisheries are to the effect that a good run of sockeye salmon occurred this year for the first time since 1909, in the Stuart Lake district at the headwaters of the Fraser River, B.C. The advance of sockeye at this once important spawning area of the river during the past 16 years is due, according to the department, to the rock slide which occurred in Hell's Gate Canoe in the lower Fraser in 1913. This slide completely blocked the river to the ascent of salmon.

Keep Minard's Liniment handy

Prince Took Part In Sports
British bluejackets who were seeing the Prince of Wales home from South America aboard the Repulse displayed their versatility in a series of comedies which they gave on the quarter deck. In one of these the Prince himself appeared with great success in the role of a woman.

Western Canada Wins Most Of The Prizes At Toronto Winter Fair

Toronto.—In judging of dairy cattle, creamery butter, grains and poultry, completed at Royal Winter Fair, Saturday, Western Canada more than held its own. Draft horses were also judged Saturday with R. E. Drennan, Canora, Sask.; Andrew Dollar, High River, Alberta; and William Merfield, Ridgeway, Ont., the judges.

In the light draft class, H. Vernon, of Port Perry, Ont., had first on a mare, and Boyd Bros., Warren, Man., second and fourth with "Jack" and "Kale." This pair took them to first place in the team. In heavy drafts, Dominion Transport Company, Toronto, had first and second places with "Clinker" and "Heracles" and "The Chief," owned by the Manitoba Cartage Company, taking third. In two-horse and six-horse teams, Manitoba was second.

In Ayrshires, Shannon Bros., of Cloverdale, B.C., had junior champion, and the colony farm, Essondale, B.C., won several first and seconds on their young Holsteins. B.C. Guernseys and Jerseys also did well.

Saskatchewan practically swept the boards in hard spring wheat, and Wm. Darnborough, Laura, Sask., took first in white oats, in a class of 61, and first on beans. G. Crossman, also of Laura, was first on rye, a class with 12 entries, and third for early white oats.

Winners in wheat with 25 in the running, were: 1, W. L. Clegg, Da- bilda; 2, I. C. Glem, Milestone; 3, H. H. Carter, Moscow; 4, G. M. Graham, Vidora; 5, J. B. Annable, Moose Jaw; 6, D. G. Salkeld, Uchlea; 7, A. E. Bowling, Lussland; 8, D. J. Winters, Claymore, Alberta.

J. C. Carr, of Warrenton, Man., had first on Durham wheat. Klass de Jong, Winnipeg, won first for display of vegetables, with 22 kinds and 40 varieties.

In creamery butter, Manitoba won every class. It was an immense exhibit with 35 to 56 entries in every class. Among Saskatchewan winners were: Central Creameries, Alask, 7th for 56-pound box of unsalted; Saskatchewan Co-operative, Lloydminster, 5th, and Western Creameries, Saskatoon, 8th in 14-pound box, September make; Crescent Creameries, Yorkton, 5th in 56-pound salted.

William Darnborough, Laura, Sask., in addition to his successes in white oats and beans, obtained firsts for six-rowed barley, barley special and field peas classes.

Connect Sun Spots With Earth Disturbances

Held To Be Largely Responsible For Violent Earthquakes Registered Ithaca, N.Y., Argentina.—A huge spot on the sun, estimated to be some 82,000 miles long by 27,000 miles wide, is believed by Prof. Martin G.H. Argentine astronomer of the National Observatory at Cordoba, to be largely responsible for the violent earth shocks registered here and in North America, and reported to be centred in the Orient.

Prof. G.H. says the spot which is at most divided in two, is slightly more than 20 degrees heliocentric latitude south and that today it may be observed at the sun's central meridian, when its electromagnetic action over the earth is strongest.

No Embargo On Wheat

Vancouver.—Estimates made by the grain trade here place the amount of damp or "tough" wheat at sixty per cent. of the present westward movement, but railway officials believe that the situation does not warrant the placing of an embargo on wheat shipments to this port.

Gen. Smuts Says Britain Working for Future Peace And Welfare of Europe

Cape Town, South Africa.—The attitude of the British Dominions to the Locarno pact was dealt with by General Jan Christiaan Smuts in a speech before a meeting of the League of Nations Union here, when he declared that whatever their opinion might be about the policy of British adherence to the treaty, they should recognize with pride that Britain, in accepting the dangerous obligations of the pact, had no end of her own to serve. She was acting, he said, with a single eye

Mummy Of King Tut

Removed From Tomb Where It Had Lain For Centuries

Calcutta, Egypt.—The inner coffin of Tut-Ankh-Amen's sarcophagus, containing the mummy, has been removed from the Pharaoh's tomb to that of Seti II., nearby, for examination.

The coffin which is of human shape, with a painted face believed to represent the features of the young king himself, is one of the most beautiful pieces of work discovered.

The mummy, however, was found to be adhering to the sarcophagus, owing to the liquids poured over it in the ceremonies whereby the Pharaoh was dedicated as a god.

All those present at the removal of the sarcophagus from the tomb were greatly impressed with the richness and majesty of the art. Several days of careful work will be required to detach the mummy safely from the adhering shell.

British Submarine Lost

Crew of Four Officers and Sixty-four Men of Other Ranks Lost Lives

London.—The admiralty announces that the submarine monitor M-1 has not been seen since she dived fifteen miles south of Start Point, in the Orkney Islands. Four officers and 65 men of other ranks lost their lives.

The M-1 is one of the largest and newest submarines in the British navy, the distinguishing feature of her class being that they each carry one 12-inch gun, which is understood to be loaded at the surface and then fired after the boat is submerged to 12 to 20 feet, periscopes being used for sighting.

These boats were laid down under the war emergency programme of 1917.

The Washington naval treaty forbids the building of any more submarines carrying 12-inch guns.

Asked Germany For Answer

Reply to Allies Latest Note Delivered In Rush

Berlin.—Germany's reply to the latest allied disarmament inquiries was delivered at Paris at midnight following an urgent telephone message from Ambassador Doesch saying that unless there was immediate delivery of the evacuation of Cologne, chiefly desired by Germany, would not materialize.

(The allied note was in the nature of a final cleanup of the disarmament problem calling attention of Germany to certain disarmament desires still entertained by the allies.)

Organizing In Victoria

Branch of Canadian Ku Klux Klan Has Been Started

Victoria.—The Times says: "Organization of the Canadian Ku Klux Klan has started in Victoria. Captain W. B. Laycock, D.S.O., one of the leaders in the movement on the mainland, arrived from Vancouver Thanksgiving Day and at once started organization work going. The Klan here will be a branch of the Canadian organization which has its headquarters in Shaughnessy Heights, Vancouver.

"Local Klansmen will wear the full hooded regalia and take their oath under the burning cross."

Launch Owners Lose \$400

Victoria.—For neglecting to comply with customs regulations when she entered Canadian waters, owners of the Seattle gasoline speed launch, Jack M. 996, have forfeited a \$400 deposit paid when the craft was released from custody.

Taking Great Airman Home For Burial

Body of German Ace Removed From France to Berlin

Berlin.—Baron Manfred von Richthofen is coming home. From his rest in France beneath the earth which he consecrated with deeds of chivalry are he fell in flames, they are bringing him back to Berlin for a military funeral before burying him here.

Capt. Baron von Richthofen was killed in battle fighting two British planes, while three miles away more than twenty of his comrades were fighting about an equal number of British birdmen. The German ace was buried by his British foe with the most impressive ceremonies near the little town of Sally le Sas, in Northern France.

Six British officers acted as his pallbearers. As the coffin was lowered into the ground great numbers of British planes whirled overhead, the drone of their engines forming the accompaniment to the words of the British clergyman who spoke the Church of England service.

Imperial Trade Allied With Empire Settlement

Canada's Food Controller During War Says "Trade Follows the Flag"

Vancouver.—"What we in British Columbia should grapple with, is, in my mind, how are we to help the empire and ourselves by getting ready and having a policy, plans and organization to take care of the people who want to come here and settle and be producers," said H. H. Thomson, food controller of Canada during the war, in an address to the board of trade. Mr. Thomson recently returned from England and as a leading economist of the country, his remarks were listened to with keen interest.

Imperial trade, Mr. Thomson pointed out, was very closely allied with empire settlement for "trade follows the flag."

He alluded to the trade possibilities and said Canada's wheat production alone in 1923 could have supplied the whole of Great Britain's requirements. He gave figures to show the vast markets for Canada's products in Great Britain.

Well Known Architect Dies In St. Louis

George Raby Served on Board Which Drew Plans For Old Parliament Buildings at Ottawa

St. Louis, Mo.—George Raby, one of the architects who designed the Canadian House of Parliament destroyed by fire at Ottawa during the war, died Nov. 19 of influenza attendant upon advanced age.

The dean of St. Louis architects, as Mr. Raby was known, celebrated his 96th birthday on October 19 last.

Born at Manchester, Eng., the super-builder was educated in the Old Country and emigrated to Canada in 1869. He resided in the Dominion for eight years and was called to serve on the board of architects which drew the plans for the old Parliament Buildings at Ottawa. Mr. Raby later moved to Quincy, Ills., being the builder of the mammoth Burlington railroad bridge there.

Undesirable Immigrants

Would Tighten Restrictions To Prevent Entry of Half Wits

Ottawa.—Loopholes in Canada's immigration barrier are allowing half-wits and sub-normal mentalities to slip into the Dominion and become absorbed in the population, according to a resolution which was framed at a session of the Canadian Education Association, and which the association will be asked to endorse.

The resolution, which was proposed by R. H. Cowley, of Toronto, a leading educational authority, asks the Federal authorities to tighten its immigration restrictions.

Saskatchewan Rhodes Scholar

Regina, Sask.—Chalmers Gillis Clark, of Saskatoon, was appointed Rhodes scholar for Saskatchewan to go into residence at Oxford in October, 1926. He is a graduate in arts from the University of Saskatchewan, class 1925, with high honors in mathematics. In athletics, he has been prominent in rugby, basketball, hockey and golf. He is the second son of Rev. W. C. Clark to gain this honor.

Alberta Redistribution Problems

Edmonton, Alta.—Alberta redistribution problems are again being grappled with by the legislative committee, of which J. N. Johnson, M.L.A. for Coronation, is chairman. Members of the committee are going into the question, with a view to deciding on some scheme for the readjustment of the provincial seats.

Was Elected President

E. Garrett, of The Signal, Watrous, Sask., who was elected President of the Saskatchewan Division of the Canadian Weekly Newspaper Association at the recent Convention held in Regina.

Saskatchewan C.W.N.A. Meet

Good Attendance at Ninth Annual Convention in Regina

The Ninth Annual Convention of the Saskatchewan Division of the Canadian Weekly Newspaper Association was held at Regina, on Thursday and Friday, Nov. 5 and 6, and was an unqualified success. A large representation of members attended from every corner of the province, and the business sessions proved most helpful. The delegates received an official welcome from Mayor Mason, who handed over the keys of the city. The Saskatchewan Co-operative Wheat Producers gave a luncheon at noon on Thursday, and in the evening the editors were the guests of the Leader Publishing Co. at a dinner. Later the delegates attended a theatre party as the guests of the Toronto Type Foundry Co. On Friday at noon the Saskatchewan Co-operative Elevator Company entertained at a luncheon, and in the evening the Weekly Newspaper Association gave a banquet, having among their guests Premier Manning, Hon. S. J. Latta, Mayor Dunning, Hon. S. J. Latta, Mable Creek, vice-president; S. J. Dorman, Despatch, Alameda, secretary-treasurer. James McDonald, Courier, Unity, was elected honorary vice-president. The following executive were elected: C. R. McIntosh, News, North Battleford; S. J. Dorman, Despatch, Alameda; T. S. McCullough, Review, Weyburn; T. E. Scriver, News, Wolsely; C. H. Ash, Gazette, Birch Hills; and E. N. Carter, Press, Wilkie.

At the closing session on Friday, officers for the ensuing year were elected as follows: Hon. S. J. Latta, Prairie News, Guyan, honorary president; E. Garrett, Signal, Watrous, president; W. G. Redmond, News, Mable Creek, vice-president; S. J. Dorman, Despatch, Alameda, secretary-treasurer. James McDonald, Courier, Unity, was elected honorary vice-president. The following executive were elected: C. R. McIntosh, News, North Battleford; S. J. Dorman, Despatch, Alameda; T. S. McCullough, Review, Weyburn; T. E. Scriver, News, Wolsely; C. H. Ash, Gazette, Birch Hills; and E. N. Carter, Press, Wilkie.

Most of Grain Now Threshed

Threshing in Saskatchewan Is Rapidly Nearing Completion

Regina, Sask.—Over 85 per cent. of the threshing is completed in Saskatchewan as a whole, but about 25 per cent. of the grain remains to be threshed in the southwest part of the province, according to telegraphic reports received by the statistics branch of the provincial department of agriculture. Practically all the grain has been threshed in the southeast.

Very little grain will remain unthreshed at the end of this week if the present favorable weather continues. Work on the land ceased the third week in October with the coming of the freeze-up in most districts. No shortage of labor has developed, threshers experienced little difficulty in finding men to complete their crews.

Britain's Heavy Task

Carrying the White Man's Burden in the Near East

Montreal.—Speaking on the development of the Near East under British rule, or through mandates from the League of Nations, Sir John Power, Bart., member of the British House of Commons for Wiltshire, Surrey, before the Canadian Club, emphasized that Great Britain was in oriental lands "by force of circumstances and the will of God." He outlined the tremendous improvements in government and in ordinary life under British jurisdiction, and indicated that the British people regarded the task in the Near East as part of the mission of civilization and as a portion of the "white man's burden." Results justified the empire's effort.

Alberta Rhodes Scholar

Edmonton.—Clarence Sutherland Campbell, B.A., of the University of Alberta, an Edmonton man, has been awarded the Alberta Rhodes scholarship for 1926.

Place Embargo On Grain Shipments To The Pacific Coast

Summer Follows

Volcanic Eruptions

Unusual Weather Conditions Prevail In Parts of Alaska

Anchorage, Alaska.—Summer-like weather in this region followed the eruption of Mount Shishaldin, an active volcano on Unalak Island, in the Aleutian Archipelago more than 600 miles southwest of here.

Rivers are remaining open, mountains a hundred miles north are smoking, and the whole landscape remains green. Prospectors in remote sections are being held prisoners by the open weather, for they have been waiting for the rivers to freeze so they can make their way out. Many are reported short of provisions due to the unusually long season. Lack of frost and snow is particularly noticeable, for mountains usually covered with snow at this time of year, remain bare.

All of Cook Inlet is affected by the phenomena.

During the first ten days of November, the average minimum temperature was 30 degrees. Shishaldin is 9,387 feet high.

Trying To Help China

Britain and United States Working Together Says Sir Esme Howard

Kansas City, Mo.—"Great Britain and the United States are working together to get China on her feet and to free her, by our friendly assistance, from the Communist domination under which at one time a considerable part of her population seemed anxious to fall," Sir Esme Howard, the British ambassador, said at a dinner of the Knife and Fork Club of the St. Andrew's Society.

"If England and the Dominions on one side," he said, "and this great republic on the other, can continue to stand shoulder to shoulder to promote peace and prosperity in the Far East by fair play and justice, and open and frank dealing with the two great Far Eastern nations, China and Japan, we shall accomplish there what I sincerely hope France and Germany and the other signatories of the Locarno treaties at least will accomplish in Europe, a just and enduring peace."

Alberta Extends Corn Belt

Corn From Northerly Points Takes Prize At Annual Show

Lethbridge.—Alberta showed the corn belt a couple of hundred miles further north when the first corn show of provincial importance was held here Nov. 11 and 12.

More than 2,600 ears of corn were entered in the competition.

Prize corn from points as far north as the Goose Lake line of the C.N.R. was shown.

Southeastern Alberta points carried off the major share of the prizes. The Alberta Corn Growers' Association was organized with Don Bark, of Brooks, as president, and James Murray, of Medicine Hat, as secretary.

It was decided to hold the first provincial corn show next year in Medicine Hat.

Coal Shortage Causes Suffering

New York.—Women and children are freezing to death in New England because of the coal shortage, E. W. Goss, representing the New England governors' fuel commission, declares. He was testifying at the opening of a hearing before Interstate Commerce Commissioner Campbell to determine what measures should be taken by the commission to provide lower railroad rates on bituminous coal.

Vancouver.—D. C. Coleman, vice-president of the Canadian Pacific Railway, made the following statement here regarding the embargo on west-bound grain: "The railway companies have been compelled to issue an order in Alberta embargoing the loading of grain to Vancouver. This action is caused entirely by the condition of the grain offered for transportation."

"The Canadian Pacific alone has 546 cars loaded with grain at Coquitlam, 764 cars in transit between Calgary and Coquitlam, 328 billed out at Calgary to move west. This means a total of approximately 2,500,000 bushels. It is estimated that 50 per cent. of the quantity will require drying and treatment. The capacity for drying at elevators here is 65,000 bushels per day of 24 hours, and that capacity has to provide for grain arriving on both railways, so that the seriousness of the position will be readily realized."

"In addition to these cars, we have now at Calgary 500 cars awaiting drying at the government elevator there, 500 cars in transit to Calgary for drying and 100,000 bushels already unloaded in the elevator there for treatment. The total drying capacity of the house is 26,000 bushels per day of 24 hours. It can be judged from these figures that to load up further damp or tough grain would be anything but wise."

"As we have a very large storage capacity in line elevators in Alberta and Saskatchewan, it is not likely that this temporary condition will involve the diversion of any grain which otherwise would have come to Vancouver to other routes."

Railway Would Solve Development Problem

Hudson's Bay Area Rich In Iron Ore Says W. T. Curran

Winnipeg.—W. T. Curran, Montreal, a fellow of the Royal Geographical Society, and an admitted authority on the Hudson's Bay area, in an interview here, declared as soon as the Hudson's Bay Railway was completed, the development problems of the Hudson's Bay area would solve themselves. "There are sufficient iron ore deposits above the water level on Nastapoka Island, east of the Bay, to supply the demands of the North American continent for 50 years," he said.

Mr. Curran has visited the area several times since 1907 and has spent years studying the geographical formation, together with the late Dr. R. Bell, of the Dominion geographical survey.

He stated that he knew from personal observations that the Hudson Straits were open from four to five months of the year and that he had been assured by experienced navigators that the passage during this period "presented no difficulty to anyone who understood the northern and southern channels which led to the entrance."

Second Largest Wheat Yield

Ottawa.—Canada's total yield of wheat, now provisionally estimated in a crop report issued by the Dominion bureau of statistics at 422,327,000 bushels, is the second largest on record for the Dominion. The previous highest total was 471,159,000 bushels in 1923.

Will Leave Cologne Area Dec. 1

Paris.—The Cologne zone will be evacuated December 1. It is taken for granted in official circles, the German note on disarmament having been found satisfactory to the point that no further obstacles are anticipated.

Delay In Decision Of Railway Commissioners On Western Grain Rates

Ottawa.—Decision by the board of railway commissioners as to whether the recent order signed by Chief Commissioner H. A. McKeown calling on the railways to put into effect similar rates on grain and flour moving westward as those now effective on these commodities moving east, shall be rescinded, is not likely to be rendered for two weeks at least.

Assistant Chief Commissioner McLean and Commissioners Hoyer and Oliver, who heard the application for rescission last month, together with

Record Butter Shipments

Saskatchewan Establishes Record In Shipment of Butter to Great Britain

A record has been established in the shipments of creamery butter to Great Britain from both Saskatchewan and the Dominion of Canada during the present year. In the first nine months of 1925, 5,572,063 pounds of creamery butter manufactured in Saskatchewan has been graded for export under the Canadian federal regulations as compared with 2,726,800 pounds for the same period in 1924. During the same period a total of 17,852,072 pounds of creamery butter from all Canada was exported to Great Britain as compared with 9,200,164 pounds in 1924. These figures are given by P. C. Kidd, dairy commissioner for Saskatchewan.

"Of the estimated production of 15,000,000 pounds of creamery butter in this province, Saskatchewan consumes only about 1,000,000 pounds or 27 per cent. of the total, and the remaining 14,000,000 pounds is marketed outside the province," states Mr. Kidd. "As indicated above, the greater part of our creamery butter for the past two or three years has been shipped to Great Britain, the remainder being marketed in Eastern Canada and the United States, and a small portion at the Pacific coast.

"The per capita consumption of creamery butter in Canada is estimated to be the highest in the world. Authorities place the individual consumption at about 26 pounds per annum. The United States has the next highest per capita consumption, which is 17½ pounds per annum. The latter consumed in Canada is practically all manufactured in the Dominion."

Carbon Copy Of England

Well Known Writers Says Australia Has No Individuality

Samuel Blyth, a well-known writer of the Saturday Evening Post, and R. N. Davies, managing editor of *Munsey's Magazine*, left for China, after several weeks' sojourn in Australia. They said that their chief impression of Australia was its strong tendency to adhere to English methods, which they maintained was a handicap to the development of the country along its own lines. Blyth said that Australia was fast developing into "a carbon copy of England." He did not suggest the cutting away from England, but he emphasized the importance of her developing her own individuality, as Canada had done. He found that Australian youths, just before reaching manhood, were very much like the youths of his own country, the United States.

Many Rules For Eton Boys

Regulations As Numerous As Lessons For College Students

New boys entering Eton College in England, are confronted with as many rules and regulations as lessons. They find they may only walk in certain places; they are forbidden to go to any racecourse in the neighborhood or walk on the river bank during the Windsor races, and they are forbidden to go into any wine merchants, tobacconists or pawnshops.

No hotel, public-house, private house, house-boat or launch may be entered by boys without the express leave of their house tutor. All stops are "out of bounds" on Sundays.

Courage Has To Be Cultivated

Doubtful If Any Human Being Is Naturally Courageous

Courage is from first to last a victory achieved over one of the most powerful emotions of human nature.

It may fairly be questioned if any human being is naturally courageous. Many are naturally pugnacious, or frangible, or enthusiastic, and these passions when strongly excited may render them susceptible to fear. But take away the emotional element, and fear re-asserts its dominion; consistent courage is always the effect of cultivation.—John Stuart Mill.

Recognized Services of Late Premier

A grant of £6,000 has been made to Mrs. Massey, widow of the late Premier Massey, by the New Zealand Parliament in consideration of the valuable service rendered by the deceased statesman to the country.

Campaign Against Tubercular Cattle
It is intimated by Hon. W. R. Matherwell, minister of agriculture, that a conference of provincial governments is to be called to devise a more active programme for the eradication of tuberculosis in cattle.

Eleanor—"Would you mind keeping off my feet?"

Eugene—"That's the couple next to us."

W. N. R. 1925

Says Mars A Cool Planet

Dr. Coblentz Finds Mean Annual Temperature Around 20 Degrees Fahrenheit

With the use of an extraordinarily delicate instrument he has invented for finding out such distant facts, W. W. Coblentz, of the bureau of standards, has concluded that the mean annual temperature on the surface of the planet Mars is about 20 degrees Fahrenheit, comparing with the earth's 59 degrees.

The observations indicate that 100 degrees below zero is frequent, and Dr. Coblentz suggested that the reason for some higher temperatures he detected there might be in "the assumption that these dark areas contain vegetation having properties of the tuft-forming grasses of our high prairies, and the tussock mosses and lichens of our dry tundras, which have a high absorptivity for solar radiation." A noon-day temperature in the Martian equator, in such vegetation, might rise to 65 degrees, he figured.

Dr. Coblentz reported the conclusion that at night the surface temperature on Mars is 70 degrees centigrade below zero, but that during the Martian summer the days have a temperature of perhaps even higher than 100 degrees centigrade, or about 212 degrees Fahrenheit.

Anglo-Saxons Not Adapted To Opera

Will Not Display Their Feelings Says Canadian Star of Metropolitan Opera Co.

"The opera will never be received with open arms by people of Anglo-Saxon blood for the simple reason that the people of the Anglo-Saxon race do not give vent to their emotions as is necessitated for the complete reception of the opera in its true meaning. This is the opinion as expressed in an interview by Edward Johnson, Metropolitan Opera Company, and the man on whose shoulders falls the mantle of being Canada's premier singer. Edward Johnson, born in Guelph, is a Canadian from top to bottom, and his rapid success as an opera star is easily understood when the famous tenor is met personally; his singing ability is not only outshone by his remarkable personality and his ability to make friends.

"The Britisher, and I include the people of the United States in that, will never take to the opera as they will to the popular music," asserted Mr. Johnson, "because they do not and will not, give vent to their emotions as is demanded by the opera."

Destroys Famous Art Treasure

Gem of Naples Museum Was Object of Workman's Anger

It was announced recently that the famous Etruscan cup, one of the finest gems in the Naples Museum, was wantonly destroyed by an employee as a protest against his being made to work overtime.

The cup was a unique example of Greek art. It was decorated with numerous figures and adorned with silver ornaments. The workman, whose name is Salvatore Tita, is an ex-serviceman who was wounded in the war.

He said when arrested that he had no idea of the value of the cup and merely wanted to air his grievance.

Had To Keep Awake

Countryman Was Not Familiar With Luxury of Modern Hotel

"Every room with a bath," says the prospectus of a new and large hotel just started here.

Which reminds us of the story of a countryman, unfamiliar with such luxuries, who passed the night at a modern hotel.

"Well, did you have a good night's rest?" the clerk asked him the next morning.

"No, I didn't," was the reply. "The room was all right and the bed was pretty good, but I couldn't sleep very much, for I was afraid some one would want to take a bath, and the only door to it was through my room."—Boston Transcript.

Exchanging Courtesies

A London business man was entertaining the Canadian representative of a big firm with whom he hoped to do business, and the family were instructed to be very cordial with the guest.

"I suppose," said one of the charming daughters of the house, "that in winter you have the reindeer." The colonial looked a little abashed for a second, and then replied: "No, darling, as a matter of fact, we have snow."

Unlucky Motorist (having killed a puppy): "Madam, I will replace the animal."

Indignant Owner: "Sir, you flatter yourself!"

Jews Do Not Rule Russia

Only Small Percentage Are Members Of Communist Party

Those who imagine that Soviet Russia is ruled by Jews will be surprised to learn that, according to the latest statistics, only 28,900 Jews are registered as members of the Communist party in Russia—only four per cent. of the total membership. As a matter of fact the Jewish problem in the Russia of today is not one of political power, but rather of economic circumstances.

Since the break-up of capitalism in Russia, the Jew in the cities has been in a curious and unfavorable position. As small trader and middleman, he belonged to that class which was most hit by the coming into power of the Bolsheviks. His shop or his business was taken away from him, or else the peculiar economic conditions made his business unprofitable. Thus after the Bolshevik revolution the Jew found himself to be a bourgeois in a proletarian land. He was neither a producer nor a worker as classified by the strict code of the Bolsheviks.

The result of all this is that there has been a mass movement of the Russian Jews away from the cities to a new life on the farms in the grain provinces. More than 25,000 Jewish farmers, comprising about 4,000 families, have already established themselves in pioneer colonies, and have more than 400,000 acres under cultivation.

Beyond Human Possibilities

Physical Perfection Is Considered Hard Thing To Find

It is well to look for perfection, to seek to develop it in ourselves, and to expect it; but it is not well to be discouraged if it is not found. The ideal is seldom, if ever, attained; and perhaps that is best for a race too apt to be satisfied with mediocrity. It leaves us constantly with higher attitudes to beckon us onward and upward.

It seems the perfect human being, in the physical sense, is as hard to find as is the faultless human being in all other respects. The Life Extension Institute has examined 400,000 persons, without discovering one that came up to the 100 per cent. standard. While this is regrettable, it should not be altogether surprising. The gauge may have been set beyond human possibilities. That is the first thought. The next is that heredity and disregard of eugenics are constantly in operation on the side of imperfection. In other words, the combination of factors necessary for absolute perfection is exceedingly elaborate, and to a large extent complicated.—Ottawa Journal.

Styles Are Far Reaching

Even Hearse Has Undergone Changes In Recent Years

Ma's last earthly ride has undergone some style changes in recent years. The ornate hearse is out of date and most citizens now go to their final rest in a vehicle not greatly different from the family automobile.

One of the country's largest hearse makers, located at Quincy, Ill., manufactures a plain coach resembling a limousine but with the door in the rear. Except for the vehicles sent to Latin American countries and a few to large cities having numerous foreign residents, this is the approved type of funeral carriage for all classes.

This firm ships to Mexico, Cuba, and South America. The Mexican wants his funeral carriage burnished with gold, lined with purple and painted with light grays. The Cuban likes the full ornamentation, the angel figures, the drapery, a platform for the casket, with a canopy above supported by winged seraphs.

The horse-drawn hearse was discarded about 15 years ago. The hearse manufacturers build the bodies and mount them on various makes of automobiles.

New York's Woman Blacksmith

Has Worked at the Trade for Thirty Years Starting in Russia

The distinction of being the only woman blacksmith in New York City goes to Mrs. Sophie Penkshon, 54, who piles her trade in her smithy at Pike Street. "I've been at the forge thirty years," she said. "First I worked with my husband, Morris, when I was a bride in Odessa, Russia. Nineteen years ago we came to America. He died in 1919. I was poor, and there was little Rose to support. So I carried on. I've never been hurt by a horse, and I'm not afraid of any of them. They're unlike many human beings—they don't kick."

Mean Thing

Hospitable Host—"Won't you have some more duck, Miss Stömmen?"

Dashful Guest—"No, thank you."

"Oh, do. Here's a nice little leg, just your size."

An Englishman's Experience

Britisher Thoroughly Enjoys Trip To West As Harvest Hand

In a recent article published in the London, England, Spectator, entitled "A Green Hand's Experience of Harvesting," Major Francis Yeats-Brown tells how he started last August from Montreal with a party of 500 men en route to work in the harvest fields of Western Canada. At Winnipeg, he states, he was courteously received by different officials, and was sent immediately to a farm south of that city at Dufrost, where he was well treated by both his employer and his employer's family. While not actually working in the grain fields he attended to the livestock and thoroughly enjoyed his experiences.

"In England," says Major Brown, "there is depression and the dole. The work in Canada is not impossible for even a sedentary man to do. Indeed, after the first few days it was pleasant. I have proved it with my two hands. Why do Englishmen remain at home? Are we, as our critics say, exhausted by the war and content to let others take the chance of adventures which young Englishmen used to be the first to seek. And what of the sad dole whose millions go to a multitude without heart or life when a little of these sums directed toward Dominion settlement would cure a part of our unemployment for ever?"

"In 1923 about 12,000 English harvesters came to Canada and, though some returned, the greater part are still in Canada and prosperous in various degrees. Far from being a failure, as is sometimes absurdly stated, this movement of English harvesters was one of the soundest schemes of land settlement in recent years." Major Brown declares that there is no reason why another 10,000 harvesters from England should not come to Canada next year and do, at least, equally well.

Would Always Help Britain

Dominions Stand Ready to Aid Motherland If Necessary

Richard Webb, a British authority on constitutional questions, is of the opinion that the Locarno treaty "might dissolve the British Empire" as it provides that in the event of Britain being at war any one of the Dominions might take, and be accorded, the status of a neutral. But does Mr. Webb suppose that this will make any real difference? Does he imagine that Canada would have been neutral in the great war if a Locarno treaty had declared her legal right to do so? The Dominions will be with the Motherland in any war in which their aid is needed.—Toronto Star.

Will Attempt English Channel Swim Again

Argentine Girl Plans Another Trial In Two Years

Miss Lillian Harrison, the youthful Argentine swimmer, will make her next try at the English Channel in 1927. Her parents made this announcement aboard the steamer Highland Loch, which took them to Buenos Aires. Miss Harrison has already made several unsuccessful attempts to swim the channel.

The girl, who is now in a ladies' institute, in London, will pass the two years in learning Swedish massage and acclimating herself to the European climate, so as to be able to make her next attempt under the best possible conditions.

The Cure For Poverty

Helping People To Help Themselves Is Best Method

As smart a thing as ever was printed is going around credited to Henry Ford. He is quoted as saying: "The cure of poverty is not charity. Nothing that you give a man will do him much good. You may relieve for the moment his difficulty, but he will drift back again. What is best for the man who needs help is to give him the chance to help himself. If you can make him self-supporting, you will also make him self-respecting. A chance to work his way is much better for him than a chance to shirk his way."

Gong Calls Doctor

Tired of rumbling over in search of her husband, Dr. A. Clark, of Morristown, Ind., when a patient calls, Mrs. Clark has erected a gong in her yard. The gong can be heard all over town. So when a patient calls to see the doctor Mrs. Clark sounds the gong and the checker game down at the store must wait until he comes back.

Voice from the next room—"George, are you teaching that parrot to swear?"

George—"No, mother. I'm only telling him what not to say."

Says Radio Kills Thrill Of North

Romance of Explorer's Life Gone Says Eugene MacDonald

An Arctic explorer's life "A lot of what it used to be." With this bald statement, Lieut.-Commander Eugene F. MacDonald, of the S.S. Peary, summarized his six months "summer vacation," in the Far North as a junior officer to Commander Donald MacMillan, of the MacMillan Arctic expedition, upon his arrival home. Mr. MacDonald, president of the Zenith Radio Corporation, told Chicago newspaper interviewers that the romance of the explorer's life in the Far North is done, simply done, because radio has taken away the thrill and peril, supplemented by worry and lack of communication heretofore experienced by all who visited the untravelled wastes.

The accomplishments of the expedition were summarized by Mr. MacDonald in three sentences:

(1) "The charting of part of the 2,000,000 square miles of the unexplored region, northeast of Alaska and southwest of Greenland by government aeroplanes, which also gained the knowledge of temperatures at altitude never before penetrated by a human."

(2) "The work of the National Geographic Society representatives in gathering valuable scientific data and specimens of life, birds, flowers and wild life."

(3) "The proof that low wave transmission can successfully operate in daylight as well as night regardless of magnetic or air conditions."

These accomplishments, Mr. MacDonald says, when analyzed will give more in research knowledge than any previous expedition or any other will ever accomplish."

Big Fish Catch

Harvest of the Sea Is a Most Important One

Fish, valued at \$3,724,133, and weighing 153,605,500 pounds, were landed by Canadian fishermen on the Atlantic and Pacific coasts of the Dominion during the month of September, 1925, according to a report by the Canadian Government department of marine and fisheries. The month's catch is an increase of 44,751,000 pounds, valued at \$34,118 over September of last year. Increased catches were recorded in cod, pollock, herring, pilchard and salmon.

On the Atlantic coast the quantity of cod, haddock, hake and pollock landed was 50,175,443 lb., compared with 52,624,800 pounds in the same period of 1924. The catch of cod shows a large increase of 16,296,400 pounds, the quantity taken being 62,972,400 pounds. This increase is accounted for mainly by the success of the Lunenburg, Nova Scotia, fishing fleet. The catch of pollock was more than double that of September, 1924, there being 1,875,000 pounds taken.

On the Pacific coast the catch of halibut was 3,373,600 pounds in September of this year, compared with 2,346,300 pounds in September, 1924. There were also 45,656,400 pounds of salmon taken, compared with 23,338,500 pounds in the preceding September.

A Reasonable Conclusion

Garage Man Had Manager Wondering When He Would Resume Work

Arriving at the garage one morning the manager was surprised to see that there was no one in charge of the gasoline pump. He straightway called one of the mechanics.

"What's become of Mason?" he queried. "He should be attending the pump."

"Yes, sir," answered the mechanic, "but his father died last night."

"Oh, I am very sorry."

The next day came and passed, then the next, and so on for four days, but the missing man didn't turn up. On the morning of the fifth day the manager again inquired for Mason.

"I told you," replied the mechanic, "that Mason's father—"

"Well, look here," interrupted the other, "just slip round to Mason's house and find out if he's going to stay away from work all the time his father's dead, will you?"

Fast Plane Carries 16

The most powerful single-engine aeroplane in the world was exhibited recently at Royal Air Force meet in England. It is a biplane with a 650-horsepower engine. It will carry as many as 16 passengers, with baggage, at a speed of more than 110 miles an hour.—Popular Science Monthly.

Shows Car's Width

In England there are small lights on the front fenders of all automobiles to indicate the extreme width of the car. This precaution is believed to have prevented a great many night accidents.

Why People Take Cold

Causes for colds, attributed to hundreds of different atmospheric and physical disturbances, is chiefly due to over-fatigue and stale air, according to a bulletin issued by the United States public health service. The majority of colds are "caught" during the months when little outdoor exercise is taken.

Celebrates On Air

The voices of famous men and women, both living and dead, will be broadcast in England, through an arrangement between British Museum and British Broadcasting Company. The voices will be taken from phonograph records taken years ago.

Great War Was Inevitable

Could Not Be Averted Says Lord Grey of Fallodon

Gradually new light is being thrown on the events and circumstances that rendered the Great War inevitable, and on the efforts made to avert it when its shadow first loomed over Europe. No more valuable contribution towards a better and truer realization of the nature of the gathering storm, and the desperate struggle of the statesmen against the elemental forces then let loose, has been made than the books of memoirs recently published by Lord Grey of Fallodon. He may well be styled the protagonist of peace, although he lost the preliminary battle against an all-powerful destiny. In his book he anxiously examines and debates the recurring question: Could the war have been averted? His final answer, given with as intimate a knowledge of the internal situation in Europe as any living man possesses, is a deliberate "No." History will, at least, credit him with doing all that, humanly speaking, could be done with in the compass of a few weeks, and in a time of whirling and bewildering storm and stress to avert the great disaster.

Hungarian Asks Exchange Of Stamps

Boy Scout Sends Fifty-five and Wants Canadian Ones

The International Bureau of Boy Scouts' policy of communication between boys of the different nations has brought in Regina Scout headquarters a strange letter in a foreign language, the only English words being written on the envelope.

Inside were 55 postage stamps and two scraps of paper with a message which defied all attempts at punctuation. The epistle was given in charge of an interpreter, who gave the translation thus: "To whom it may concern, I am sending you postal stamps (Hungarian), which, please, have exchanged for others." The address proved to be "Somogyi meghe" Kanizsai utca 45, Kaposvár, Magyarország, Hungary, Europe," and the youth's name, Jozsef Kosaras.

The letter took two months to arrive and was covered with postage stamps, whose denomination was 1600 and 2000 Korona, the total cost being 15,000 Korona.

Sockeye Salmon Egg Gathering

Department of Marine and Fisheries Secures Huge Quantities For Hatcheries

The department of marine and fisheries reports the collection of 40,500,000 sockeye salmon eggs by the Pemberton hatchery on the Skeena River, British Columbia. This collection exceeds the largest collection made in any previous year by more than 10,000,000 eggs. The egg collecting operations in other parts of the province are far from being completed, but they show a total collection to date of more than 65,000,000. In Lake Winnipeg 75,000,000 whitefish eggs have been collected for the hatchery at Gull Harbor, and reports from other sections indicate a satisfactory season.

The Pemberton and Gull Harbor establishments are the only ones at which the egg collecting operations have been finished.

Artificial Waterfall Higher Than Niagara

Will Supply Electrical Power For All Trains In Switzerland

An artificial Niagara, in the Alps, at an altitude of more than 6,000 ft., was recently completed where the barrage of the River Barberine, in the Canton of Valais, was opened with great ceremony by the Swiss authorities. The waterfall is slightly higher than the Niagara Falls. The cost of the enterprise is nearly £2,500,000, but the outlay will be recovered within a few years, as the electrical power supplied by the dam will be amply sufficient to drive all the trains in Switzerland, and they will be consequently independent of foreign coal.

Why People Take Cold

Causes for colds, attributed to hundreds of different atmospheric and physical disturbances, is chiefly due to over-fatigue and stale air, according to a bulletin issued by the United States public health service. The majority of colds are "caught" during the months when little outdoor exercise is taken.

Celebrates On Air

The voices of famous men and women, both living and dead, will be broadcast in England, through an arrangement between British Museum and British Broadcasting Company. The voices will be taken from phonograph records taken years ago.

WORLD HAPPENINGS
BRIEFLY TOLD

Reports being prepared by J. D. Soper on Canadian expeditions to the Arctic, will be complete in 1926.

Rev. John Carter, 61 years of age, son of John Carter, Toronto, has been elected mayor of Oxford.

H. J. Browne, meteorologist of Washington, D.C., predicts 1926 will be a year without a summer with agriculture almost impossible.

The new Canadian Red Cross Hospital was formally opened at Eaglehart, Ont., by Hon. Lincoln Goldie, provincial secretary.

More than 400,000 people travelled by water between Canada and the United States during the year ending June 30th, research bureau shipping board records reveal.

A memorial tablet to the late Sir William Price was unveiled at the Armistice memorial service held in St. James' Anglican Church at Kenogami, Nov. 8.

With the 1925 season of navigation nearing an end, statistics compiled at the port of Quebec show that 78,288 passengers were landed up to Nov. 7, bound for Canada and the United States.

Sir Horace Rumbold, British ambassador to Madrid, will head the commission of the League of Nations, which will inquire into the reasons for the fighting between the Bulgars and the Greeks recently.

The Manitoba Power Company will spend \$2,000,000 in new equipment and transmission lines following successful negotiations for supply of power to the Manitoba Pulp and Paper Company mills at Port Alexander.

The "death ray" inventor can make music come from beams of light. H. Grindell Matthews has shown how his lumiphone works. He also has a device for advertising in colors in the clouds.

After working on his invention for sixty years, John Smith, engineer of Winnipeg, claims to have perfected a "stationary engine capable of controlling and producing its own, self-manufactured power." He has a "perfect" model on demonstration.

Vice-Admiral Sir Roger Keyes, commander-in-chief of the British Mediterranean fleet, was slightly injured when an aeroplane in which he was riding crashed into the sea. The pilot and another officer in the plane suffered slight cuts and bruises.

Big Slump In Shipbuilding

Industry Suffers Most Decided Drop Since Great War

Shipbuilding throughout the world suffered its most decided slump since the war during the last summer, the department of commerce announced recently.

Reports for the third quarter of 1925, ended Sept. 30, received from Lloyd's Register, showed a drop of more than 150,000 tons.

Motor vessels declined 40,000 tons during this period, construction of other classes of ships, it was stated, has been decreasing steadily.

Construction in this country dropped 22,000 tons, while the decrease in Great Britain and Ireland was reported to be \$4,000 tons. The largest decrease was reported from Germany with a 100,000-ton drop. France declined 19,000 tons and Denmark 7,000 tons.

Italy and Holland showed the only increases in work started during this period.

May Be Important Discovery

Cancer Scourge Is Cured By Lead Says Liverpool Professor

Selecting a meeting of the Toronto Academy of Medicine for an announcement of world-wide interest to the medical profession and victims of cancer, Prof. W. Blair Bell, of Liverpool University, and honorary director of the Liverpool Cancer Research Institute, told leading physicians of the city of the successful treatment of the dread disease by the chemical agent, lead. He cited several instances in which remarkable success had been achieved, and assured the members of the academy that 50 or so patients were believed to be well, out of about 200—mostly hopeless cases—treated.

Many Savings Accounts

There were 101,516 savings accounts in Hawaii banks during the past year, totalling \$21,708,271.75. Anglo-Saxon accounts registered the highest total, while savings deposits by Japanese increased more than \$1,000,000 over the previous year.

Remember there is a limit to human endurance. The friend who stands up for you may tire in the course of time and sit down.

W. N. U. 163

Wide Phone Service

Long Distance Service in Alberta Has Been Made Continent-Wide

With due ceremony, the inauguration of the continent-wide telephone service from Alberta was celebrated recently, when Governor Brett of Alberta conversed over the long distance telephone with state officials in the states of Montana, Colorado and Arizona, and with Chief Justice Anglin at Ottawa, Ontario. The inauguration of this service, by which Alberta telephone subscribers will be able to converse with any point in the United States and with many points in Eastern and Western Canada and on the coast, was made possible through the co-operation of the Mountain States Telephone Company with the Alberta Government Telephones. Repeaters have been installed at Lethbridge, Calgary and Medicine Hat, and copper circuits set up from Lethbridge to the boundary of Montana, linking up with copper circuits extended north from Shelby, Montana. This has made possible the connection with the transcontinental system in the States.

In connection with the historical step taken by the Alberta Government Telephones, it is interesting to note that long distance service in the province has grown from 1,000,000 to 2,500,000 calls in the past ten years, and that in that time the revenue from long distance service has grown from \$393,300 per annum to over \$1,000,000 per annum.

The first commercial call over the new universal system was given from Edmonton, when a resident of Edmonton conversed with a friend in Minneapolis, Minnesota.

Advance In Medical Science

Toronto Doctor Announces New Serum For High Blood Pressure

A serum which may reduce the morbidity of high blood pressure was described by Dr. F. H. G. Starr, of Toronto, Canada, in an address before the clinical congress of the American College of Surgeons, Philadelphia.

Dr. Starr said that William J. McDonald had been working on the serum in the research laboratories of the University of Toronto for some time, but that it had not yet reached a point to permit a detailed description or an optimistic statement of its probable efficacy. He said the serum was a liver extract. High blood pressure, he explained, usually was due to hardening of the arteries, which is induced by an inflammation, possibly of germ origin.

Edmonton Attains Majority

Was Officially Created a City on Nov. 7, 1904

Edmonton became an adult among cities on Nov. 7.

Just 21 years ago, on November 7, 1904, Edmonton was officially created a city. Since that date the population has grown from 7,500 to 65,378.

There are 20 trains entering the city daily, as compared with one then; 13,484 telephones in use where 450 supplied the baby city.

The fur trade and the Klondike rush put the city on the map in the early days.

Now it is the legislative and educational centre of the province and the distributing point for Central and Northern Alberta, as well as the gateway to the Arctic fur lands.

New Colonization Plan

Community Move of British Settlers to Canada Is Proposed

While the department of immigration is working with the overseas settlement board on a full cooperative plan for the purpose of increasing immigration to Canada from the United Kingdom, denial was made at the department of any personal knowledge or official connection with a new scheme of colonization, reported from London, calling for the migration of 50,000 families to the Dominion within a period of five years.

These families, according to the cable report, were to be settled on Canadian farms in communities, and not in colonies.

Ashes of Climber Scattered

From the summit of one of the highest mountains in the lake district, north of England, the cremated ashes of Seymour Gubb were scattered to the wind as a fitting funeral rite for a mountain climber. Mr. Gubb, who for 33 years was headmaster of Taunton's School, Southampton, has been noted as a mountain climber for many years. Fellow climbers conducted the funeral service.

She: "My father gives me a dollar every birthday. I have now eighteen." He: "How much does he still owe you?"

Many a woman uses make-up merely because she hasn't the cheek to do without it.

A Western Editor M.P.

Cameron R. McIntosh, B.A., Liberal member for North Battleford, is the only editor which Western Canada is sending to Ottawa. Mr. McIntosh publishes three weekly newspapers, The North Battleford News, The Battleford Record and the St. Walling Times. Mr. McIntosh has been an active member of the Saskatchewan Press Association since it was first formed, and on the executive since it had an executive, serving several terms as president. He was one of the Saskatchewan editors who went over to the European continent with the Canadian Weekly Newspaper excursion in 1924 and were honored in most of the capitals of Europe, and entertained by royalty in Great Britain and Belgium, and by Marshal Foch in Paris. He is an enthusiastic Canadian Club member, treasurer and first president of the Canadian Club of the Battlefords, and for two years represented Saskatchewan as vice-president on the national executive of the Canadian Clubs of Canada.

Frocks That Have Made Themselves Very Popular

Simple enough for street wear—and charming enough for bridge or dance! Fashion still smiles upon these simple frocks, both of which were fashioned from one pattern. The little frock of flowered material has two side panels trimmed with narrow lace, and then shirred onto the one-piece foundation at the raised waist-line. The round neck and short kimono sleeves are finished with the narrow lace, and a ribbon of pastel color ties in long ends at the back. A bordered material was used with charming effect for the plain frock, which opens at the neck with flat revers and has long sleeves gathered into a narrow band. No. 1166 is in sizes 16, 18 and 20 years (for 24, 26 and 28 inches bust). Size 18 years (or 36 bust) requires 2 1/2 yards of 32-inch or 36-inch material. For side panels 3/4 yard extra material, and for long sleeves 1/2 yard. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Walking Stick Farms in England

Walking stick farms are not uncommon in England. To obtain a right-angled handle, the growth is pegged down along the ground, and from this reclining stalk the sapling shoots upward vertically.

Surgeons Revert To Old Practice

Doctor at Johns Hopkins College Tells How Injections Purify Blood

Modern surgeons have partially reverted to a practice of the Dark Ages, when blood letting and leeches were considered the most efficacious of remedies.

The medical wizards of those ages believed the blood stream carried all diseases. When a man in those days had a fever, a cold, or affliction of any sort, a "chirurgion" was called in and his patient was at once bled.

But, although modern science has returned in part to this practice it is teaching also that the blood stream can be purified with powerful injections—known as diphtheroids.

All this was brought out by Dr. Hugh M. Young, of Johns Hopkins Medical College, in explaining the work undertaken by the American College of Surgeons in the formation of a committee on antiseptics, of which Dr. Young is chairman, to gather material for a vast symposium on modern antiseptic surgery.

This work is undertaken as a memorial to Lister, the hundredth anniversary of whose birth will be celebrated April 15, 1927. Lister, working on Pasteur's theory of the germ origin of infection, by his antiseptic discoveries, laid the foundation for modern surgery.

Circles Globe In Small Boat

"Library Navigator" Travels 38,000 Miles In Homemade Craft

Circumnavigation of the globe in a 34-foot sail boat was accomplished by Harry Pligerson, 54 year old photographer, known to many as the "Library navigator." He made port at San Pedro, Cal., after travelling 38,000 miles in his homemade cockle shell craft, the Islander, since he set sail from San Pedro, November 18, 1921.

The Islander traversed seas notorious for bad weather. Leaving San Pedro, she went to the Marquesas Islands in the South Seas in Torres Straits, across the Indian Ocean to Mauritius and southwest to Capetown. Then she made St. Helena and crossed the Atlantic to Panama. She left the canal zone last August 7.

Pligerson was dubbed the "Library navigator" because of the unusual manner in which he obtained sailing knowledge. With books from a branch library here, he spent what time he could spare from the construction of the Islander in studying navigation. All his information about sailing was acquired in this way.

Trying To Make
Easter Fixed Date

Second Sunday In April Each Year Being Considered

It remains only for the international conference to put into effect in 1928 the fixing of the second Sunday in April as Easter Sunday every year, according to Moses H. Cotsworth, director of the International Fixed Calendar in Toronto, in conference with board of trade officials relative to the furthering of the 12-month-year idea, with its four weeks in a month and Leap day features. Mr. Cotsworth is a Vancouver, B.C., man, but has spent most of his time of late years in New York and London and in Geneva, where he acted as expert for the League of Nations in the subject of international reform of the calendar.

While the change in regard to Easter Sunday and its contingent movable festivals affects only the Christian nations, Mr. Cotsworth regards it as a step in the eventual adoption by the whole world of the fixed calendar idea.

One Ticket For Fourteen

Mother Had Proof That Thirteen Boys Were All Under Five Years Old

A conductor on a Burlington train near Jewell City, Mo., the other day found Mrs. Frank Scott had only one ticket for herself and thirteen children. The children occupied five double seats. "Are these all your children, or is it a picnic?" asked the conductor. They were all the children of Mrs. Scott and she had the family Bible in her suitcase to prove it. The Scotts have been married less than ten years and have nineteen children, all boys. There are five sets of twins. The thirteen above mentioned were all under five and could ride free. They were being taken by their mother on a visit to relatives in Canada.

Canadian Ayrshires Win Prizes

A cablegram to the Canadian Ayrshire Association of Great Britain and Ireland, announces that Ayrshires took six champion cups at the recent Royal Dairy Show, London.

It was a wit who said that "any free citizen can do as he pleases, except for his conscience, his wife, his landlord and his neighbors."

OUR CROSSWORD PUZZLE

Horizontal

- 1—To drive out from.
- 6—Clutches.
- 11—An animal.
- 12—Girl's name.
- 14—A cleansing agent soluble in water.
- 15—Hesitate in speech.
- 16—A goddess of retributive justice.
- 19—Point of compass.
- 20—A flower.
- 21—Pester.
- 22—Dry.
- 26—Performs.
- 27—Male descendant.
- 29—Next in order after the eighth.
- 31—A secretion from inflamed tissues.
- 32—One of the stages of life.
- 34—Large container.
- 35—Affirmative.
- 36—Part of verb to be.
- 37—Lukewarm.

Vertical

- 3—Color.
- 4—Fly.
- 13—Mead cover (pl.).
- 45—Fundamental.
- 48—Pours.
- 50—Male nickname.
- 51—Repeated as a lesson.
- 54—Part of verb to be.
- 55—Wild.
- 57—Gone by.
- 58—A melody.
- 60—An aromatic substance flowing from certain plants and trees.
- 61—A disease.
- 1—Cry of sheep.
- 2—Tunes.
- 3—Negative.
- 4—Interior.
- 5—Thigh of an animal.
- 6—An aeriform fluid.
- 7—Property.
- 8—In this manner.
- 9—Shallow dishes.

- 10—Hustens.
- 13—Lair.
- 17—Ireland.
- 18—A constant irritating desire.
- 21—Touching.
- 23—To slander.
- 25—One who dives.
- 26—A garrot.
- 28—Propeller.
- 29—Short sleep.
- 32—Pamper.
- 36—A part of speech.
- 37—Story.
- 38—An edible fruit.
- 40—Appl.
- 42—Nobleman.
- 44—Treadle.
- 46—A mental image.
- 47—Immense.
- 49—Servant.
- 52—A ruder.
- 53—Men's name.
- 56—Article (Span.).
- 59—Royal Academy (abbr.).

Keep Tenth Commandment

One Reason Why Canada and U. S. Live Peaceably

Canadian officials have issued figures on the automobile tourist influx into the Dominion during the past summer, setting forth that 2,000,000 automobiles crossed the line, carrying 9,000,000 travelers. The astonishing fact is that these 2,000,000 strangers, chiefly from "the States," equalled in number the total population of Canada.

That is, sightseeing—Americans doubled temporarily the population of our northern neighbor. The migration was made without difficulty. The visitors spoke the same language, ate the same food; near the border United States currency was accepted without question. A common language has much to do with the ease with which tourists are made at home. The chief reason for this freedom of travel is that Canada and the United States are free from jingo rivalry. Politically, Canada and America keep the Tenth Commandment. If European countries would not "covet thy neighbor's goods" many munition factories would be broke.—San Francisco Bulletin.

High Standard Of Living

Conditions of Living in United States Highest in History Says Hoover

Material conditions of living for the people of the United States during the last year have been the "highest in all history," Secretary of Commerce Hoover declared in an economic review made public as part of the annual report of the commerce department.

Factors listed by the secretary as contributing to this condition included a practically complete absence of unemployment, high wages, efficient railroad operation, an equitable balance of prices as among the greater producing groups of the population, and a gradual return to stable currencies and normal business operations among the nations abroad.

Novelty In Radio Reception

According to recent reports, the city of Rome offers the newest novelty in radio reception, in the form of "penny in the slot radio listening stations." For the equivalent of one penny, a pair of phones are placed on the head of the listener and he is allowed to hear one selection. There is but one master receiver and many sets of phones, but the listener must be content with whatever the operator tunes in.

Broadcasting Duck Calls

Onkand, Calif.—A device for broadcasting duck calls has been invented by J. V. O'Hara, president of the Vallejo Gun Club. Radio apparatus has been installed in the club's preserves, and with the opening of the shooting season in October, an alluring "quack, quack, quack" was scattered among the duck blinds.

Need Alaskan Base
For Polar Flights

Useless to Attempt Trip Otherwise Says Veteran Arctic Navigator

Aircraft can be successfully utilized in Polar exploration, providing the flights are attempted from a large base in Alaska, according to Captain Bob Bartlett, veteran Arctic navigator, who was one of the late Commander Peary's party when he made his dash to the Pole in 1909.

"It is useless to attempt to fly across the vast Arctic regions adjacent to the Pole, with only a few months preparation and with small planes," said Captain Bartlett. "And personally, I don't believe it is wise to expend large sums for expeditions of this nature that hope to make the flight from such places as Etah. There is one place where these flights can be started, and that is off the Alaskan coast and in the Polar Basin."

Find Valuable Collection

Chest of Drawers in Mayfair Yields \$75,000 in Stamps

A collection of postage stamps hidden in an old bureau in a Mayfair home in London, sixty years ago has been accidentally discovered, and found worth \$75,000. The original value was \$150. Search for a lost jewel case led to unearthing the famous collection of stamps. Some of the stamps were never before seen by collectors. The most interesting are two sheets of halfpenny Ceylon stamps, issued in 1858—the only sheets of these stamps existing. The grandfather of "the owner's" husband collected the stamps when he was young. Collectors from many parts of Europe will attend the sale of the collection.

Wonderful New Device

A demonstration of a device for the phonographic recording of heart sounds, which is expected eventually to save thousands of lives annually, by making possible improved methods of diagnosing heart diseases, has been given by the Columbia Phonograph Company, New York. It is possible to record sounds which ordinarily are so faint as to escape detection by the human ear.

A giant salamander may live to be more than a half century old.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.

"BARRE, SON OF KAZAN," a Vitaphone Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

Pierrot, the trapper, and Nepeese, his daughter, under the round of their traps to see what animals had been caught. Pierrot never left the girl alone, for he was fearful of McTaggart, the unscrupulous factor, who was determined to marry her. Barre, the wolf-dog, always accompanied them. Nepeese made a net of the dog, but Pierrot occasionally struck the dog. "If I make him hate me, he will hate all men," he explained. The father was looking into the future—for Nepeese.

CHAPTER XVII.—Continued

Now the tonic-filled days and cold, frosty nights of the Red Moon brought about the big change in Barre. It was inevitable. Pierrot knew that it would come, and the first night that Barre settled back on his haunches and howled up at the Red Moon, Pierrot prepared Nepeese for it.

"He is a wild dog, ma Nepeese," he said to her. "He is half wolf, and the Call will come to him strong. He will go into the forests. He will disappear at times. But we must not fasten him. He will come back. Ka, he will come back!" And he rubbed his hands in the moon-glow until his knuckles cracked.

The Call came to Barre like a thief entering slowly and cautiously into a forbidden place. He did not understand at first. It made him nervous and uneasy, so restless that Nepeese frequently heard him whine softly in his sleep. He was waiting for something. What was it? Pierrot knew, and smiled in his inscrutable way.

And then it came. It was a night, a glorious night filled with moon and stars, under which the earth was whitening with a film of frost, when they heard the first hunt-call of the wolves. Now and then during the summer there would come the lone wolf-howl, but this was the howling of the pack; and as it floated through the vast silence and mystery of the night, a song of savagery that had come with each Red Moon down through unending ages, Pierrot knew that at last had come that for which Barre had been waiting.

In an instant Barre had sensed it. His muscles grew taut as pieces of stretched rope as he stood up in the moonlight, facing the direction from which floated the mystery and thrill of the sound. They could hear him whining softly; and Pierrot, bending down so that he caught the light of the night properly, could see him trembling.

"It is Moo-Koo!" he said in a whisper to Nepeese.

That was it, the call of the blood that was running swift in Barre's veins—not alone the call of his species, but the call of Kazan and a Gray Wolf and of his forebears for generations unnumbered. It was the voice of his

PAINS IN BACK AND SIDES

Ended by Taking Lydia E. Pinkham's Vegetable Compound

Fusilier, Sask.—"For two or three days every so often I would have such pains in my back and sides that I could not do anything—could not even lie quietly in bed, and my head ached, too. I was this way about three years, but was worse after I was married. I was on a farm with not a house nearer than five miles and there was not a person to advise me, as my folks live in Manitoba. My sister-in-law told me about Lydia E. Pinkham's Vegetable Compound and told me to try it. I took her advice and have been thankful for it ever since. After taking the medicine for three months I can say it has helped me a lot and I am doing fine. I am glad to recommend the Vegetable Compound to others and you may publish my testimonial."—Mrs. HELEN BALANOFF, Fusilier, Saskatchewan.

Often some slight trouble will cause a general upset of the system. Such symptoms as nervousness, painful times, irregularity, backache and headache indicate some form of female weakness. Women so bothered should give Lydia E. Pinkham's Vegetable Compound a trial. This dependable medicine has helped thousands of women and it is reasonable to expect that it will help you. Try it today. Your druggist sells this medicine.

W. N. U. 1603

people. So Pierrot had whispered, and he was right. In the golden night the Willow was waiting, for it was she who had gambled most, and it was she who must lose or win. She uttered no sound, replied not to the low voice of Pierrot, but held her breath and watched Barre as he slowly faded away, step by step, in the shadows. In a few moments more he was gone. It was then that she stood straight, and flung back her head, with eyes that glowed in rivalry with the stars. "Barre!" she cried. "Barre! Barre! Barre!"

"Slinking low under the bushes, his tail drooping, his ear alert—the wolf as the wolf runs on the night trail."

He must have been near the edge of the forest, for she had drawn a slow, waiting breath or two before he was back at her side. But he had come, straight as an arrow, and he whined up into her face. Nepeese put her hands to his head.

"You are right, mon pere," she said. "He will go to the wolves, but he will come back. He will never leave me for long." With one hand still on Barre's head, she pointed with the other into the pit-like blackness of the forest. "Go to them, Barre!" she whispered. "But you must come back. You must. Cheema!"

CHAPTER XVIII.

No longer, as in the days of old, did the darkness of the forests hold a fear for Barre. This night his hunt-ery had risen to the stars and the moon, and in that cry he had, for the first time, sent forth his defiance of night and space, his warning to all the wild, and his acceptance of the Brotherhood.

He ran straight into the darkness to the north and west, slinking low under the bushes, his tail drooping, his ears alert—the wolf as the wolf runs on the night trail. The pack had swung due north, and was travelling faster than he, so that at the end of half an hour he could no longer hear it. But the lone wolf-howl to the west was nearer, and three times Barre gave answer to it.

At the end of an hour he heard the pack again, swinging southward. Pierrot would easily have understood. Their quarry had found safety beyond water, or in a lake, and the mukchums were on a fresh trail. By this time not more than a quarter of a mile of the forest separated Barre from the lone wolf, but the lone wolf was also an old wolf, and with the directness and precision of long experience, he swerved in the direction of the hunters, compassing his trail so that he was heading for a point half or three quarters of a mile in advance of the pack.

This was a trick of the Brotherhood which Barre had yet to learn; and the result of his ignorance, and lack of skill, was that twice within the next half-hour he found himself near to the pack without being able to join it. Then came a long, and final silence. The pack had pulled down its kill, and in their feasting they made no sound.

Barre had not forgotten Nepeese. A dozen times he turned his head back and whined, and always he picked out accurately the direction in which the cabin lay. But he did not turn back. As the night lengthened, his search for that mysterious something which he had not found continued. His hunger, even with the fading-out of the moon, and the cooling of the gray

down, was not sufficiently keen to make him hunt for food. It was cold, and it seemed colder when the glow of the moon and stars died out. Under his padded feet, especially in the open spaces, was a thick white frost in which he left clearly at times the imprint of his toes and claws. He had travelled steadily for hours, a great many miles in all, and he was tired when the first light of the day came.

At last it had come—the meeting with that for which he had been seeking. It was in an open, lighted by the cold dawn—a tiny amphitheatre that lay on the side of a ridge, facing the east. With her head toward him, and waiting for him as he came out of the shadows, his scent strong in her keen nose, stood Maheegun, the young wolf.

There was not a fortnight's difference in their age and yet Maheegun was much the smaller of the two; her body was as long, but she was slimmer; she stood on slender legs that were almost like the legs of a fox, and the curve of her back was that of a slightly bent bow, a sign of swiftness almost equal to the wind.

When the sun rose, half an hour later, it found them still in the small open on the side of the ridge, with a deep fringe of forest under them, and beyond that a wide, timbered plain, which looked like a ghostly strand in its mantle of frost.

Maheegun, too, had sought the hunt-pack, and like Barre had failed to catch it. They were tired, a little discouraged for the time, and hungry—but still alive with the line thrill of anticipation, and restlessly sensitive to the new and mysterious consciousness of companionship.

To the flesh-eating wild things of the forests, cawed and winged, the Big Snow was the beginning of the winter carnival of slaughter and feasting, of wild adventure in the long nights, of merciless warfare on the frozen trails. The days of spring and summer—were over; out of the sky came the wakening of the Northland, the call of all flesh-eating creatures to the long hunt, and in the first thrill of it living things were moving but little this night, and that watchfully and with suspicion. Youth mule it all new to Barre and Maheegun; their blood ran swiftly; their ears were attuned to catch the slightest sounds.

In this first of the Big Snow they felt the exciting pulse of a new life. It lured them on. It invited them to adventure into the white mystery of the silent storm; and inspired by that restlessness of youth and its desires, they went on.

(To be continued)

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home to-night. Try it.

Rub. "Whenever I see one of my creditors I always cross to the opposite side of the street to avoid meeting him."

Dub. "I tried that plan once and was arrested for walking down the middle of the street."

Forty Years' Experience

Alport, Ont.—"I have much pleasure in testifying to the efficacy of Dr. Pierce's Golden Medical Discovery which I have used in my family of nine children for over forty years. I have no hesitation in pronouncing it to be the best proprietary medicine of which I have any knowledge for building up the body and keeping it in good order. If taken according to the directions, together with Dr. Pierce's Pleasant Purgative Pellets, I am convinced that there is no better tonic. I have been treated also by the Medical Staff at Dr. Pierce's Invalids' Hotel and I have had no return of the trouble since that date (1910) which proves the thoroughness of their treatment."—H. F. Bickmore. All dealers. Write Dr. Pierce, Pres. Invalids' Hotel, Buffalo, N. Y., for free medical advice.

Find Historic Coin

Discovery of Historic Interest is Made Near Prescott, Ont.

The low water level in the eastern reaches of the St. Lawrence River has resulted in a discovery of historic interest.

Land formerly submerged to the depth of six feet now forms the beach of Prison Island. Joseph Seymour, walking there on earth which, it is believed, was never touched before by white men, found a British silver coin of the year 1793.

It is about the size of an American dollar. For "heads" it has a profile of the English sovereign bordered by the inscription, "which, so far as it can be deciphered, reads: 'God XV. O. G. P. N. V. R. E. X.' The reverse side has the royal coat of arms and the inscription, 'Sic Nomen Domini Benedicet.' The metal is in a fine state of preservation.

The islands in that part of the river are associated with the early history of North America and were occupied at various times by English and French garrisons.

HEALTH BROKE DOWN

Could Not Get Sleep for Hours After Going to Bed

"It is not natural for me to sit down and write a letter by means of a proprietary medicine as I had always been skeptical as to their virtues." Thus writes Mr. Arthur Seguin, Storthooks, Sask., who further says:—"But three years ago I opened a general store here in Storthooks and placed on my shelves a few lines of the best known proprietary medicines. Among these, naturally, were Dr. Williams' Pink Pills. As there were three of my customers who were obtaining good results from taking the pills, and as I was in need of a medicine I decided to try them myself.

I had been suffering from catarrh for years, and my inside work had completely broken down my health. I was coughing all day, suffering from indigestion, and could not sleep until three or four hours after retiring. I started the pills, not with any great confidence, but by the time I had finished the second box I marked much improvement. At the fourth box I felt quite recovered, but continued them for some further time. My cough has left me, the indigestion has disappeared and I now fall asleep almost as soon as I am in bed. In my store now I do not hesitate to recommend Dr. Williams' Pink Pills to any who are feeling run-down or without energy, as I think they are a blessing to mankind."

If others who may feel skeptical will give Dr. Williams' Pink Pills a fair trial they will be convinced as was Mr. Seguin. You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Quite a Family Affair

Two twin brother solicitors, Mr. G. H. Young and Mr. C. V. Young, appeared in a recent case at Thames Police Court, London, one for the prosecution and the other for the defence. The two prosecutors were also brothers, as were the three prisoners who figured in the case.

Rub the scalp with Minard's Liniment

High School Education

Education Provides Pavement For Royal Road to Success

There will come a time in the history of this country (and it is approaching rapidly nowadays) when a young person without a high school diploma is going to find things pretty hard in this life. For education is the stepping stone to success and independence, and without it all is slavish labor and interminable discouragement. Those who entered upon high school life this fall are to be congratulated. They are marching over a royal road and paving their own life's highway so that progress will be smooth and sure.—Montreal Herald.

"To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage healthful operation of the digestive processes. As a verminicide it can be relied on for its effectiveness."

Couldn't

Nurse: "I wonder who it was who never folded up his clothes when he went to bed?"
Tommy: "Adam!"

Preservation Of Totem Poles

Dominion Government Takes Steps to Preserve Indian Relics

During the past summer considerable work was accomplished by the Dominion Government through Mr. Harlan I. Smith, of the Victoria Memorial Museum, Ottawa, in connection with the preservation of the totem poles at Kitwanga and vicinity, along the Jasper-Prince Rupert line of the Canadian National Railways, where considerable improvement in the appearance of these poles and other Indian totems was effected, which will result in their lasting for many years. It is the intention of the government to continue the work of preservation of Indian totem poles and other relics next year in the Kitwanga district, and no doubt this policy will be extended to other districts concerned.

Drives Out Rheumatism Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pain of Rheumatism and Lumbago should read the letter of F. E. Normand, from Georgetown, who writes:

"I was fairly crippled with aching joints and Rheumatism. Nerviline must have been what I needed, because it cleared up my trouble quickly."

"If you need a reliable, strong, penetrating pain remedy, one you can depend on, get a 50c bottle of Nerviline today; it will make you well quickly."

To Save Old Sailing Vessel

Last of the Clippers to Become a Floating Museum

The Benjamin F. Packard, last of the clipper ships, has been saved from the ignominy of the junk pile and is to be converted into a floating museum.

Announcement was made by Cornelius H. Callaghan, secretary of the Maritime Shipping Exchange, New York, that thirty members of the exchange had decided to buy the old three-master from its present owners. He said the vessel will be stored with marine trophies and anchored off the Battery.

Useful in Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp. When the feet and

legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained, nothing could be better as a dressing or lotion.

London's Lord Mayor

Important Personage

But Sinks into Obscurity After Term Of Office Is Over

The Lord Mayor of London may be justly described as one of the most conspicuous personages of the realm. In fact, in the eyes of the people on the continent, especially on the occasion of his state visits to foreign capitals, he appears a far greater personage than the prime minister or the lord high chancellor. He is ex-officio a general, an admiral, a supreme court judge with powers of life and death even if he has no legal training, and a member of the privy council, entitled to wear the robes of an earl, with a precedence pertaining to that rank. He has his chaplain, his chamberlain, his sword bearer, his gentleman-in-waiting, his marshals and even his own official executioner, whose office in these modern times is, however, a sinecure. And then after the twelve months of office are over he sinks back into obscurity and few outside the body of aldermen, from which he is chosen, and the members of the ancient Plumbers Guild, of which he is now the master, will recall even his name.

Mrs.: This life-guard saved your life dear. Shall I give him a dollar?

Mr.: I was just half dead when he pulled me out. Give him fifty cents.

Zam-Buk

SAVES! POISONED LIMBS!

It was just a bad ankle that might happen anyone. But it serves to show how quickly blood-poison develops unless broken tissues have the protection of antiseptic Zam-Buk.

Mrs. A. Harrison, Place-de-Armes, Kingston, Ont., writes: "During house-hold duties my left ankle was injured by a sharp projection. Sticking dye got into the wound and its poisoned condition alarmed me. My ankle took a turn for the better, almost as soon as I began with Zam-Buk. This powerful healer dispelled all pain, suppuration and inflammation. It healed perfectly. Use Zam-Buk also for eczema, rashes, pimples, boils, abscesses, cuts, burns, scalds, etc."

Tomb Of Jonah At Mosul

Prophet Is Venerated as Saint by Inhabitants of Arab City

The Minor Prophet Jonah who has been the centre of much theological discussion, is supposed to be buried at Mosul and his traditional tomb still stands on the opposite bank of the Tigris. Mosul is an ancient Arab city, built not on the actual site, as commonly stated, but on some outlying suburb of Scriptural Nineveh. It was once a very prosperous place, famous for the manufacture of muslins, which probably got their name from this city; but commercial ruin, begun by the rise of Bushire, culminated in the opening of the Suez Canal. Mosul possesses a population of curiously mixed religions, whose theological views seem broad enough to satisfy any "Modernist." Christians and Mohammedans equally venerate the two local saints, St. George and Jonah.

BURNS

Mix Minard's with sweet oil and apply at once. Quick Relief.

"I would give anything for your consent to marry your daughter, sir."

"You would?"

"Yes, sir."

"Yes, sir."

"You're the man next door, are you not?"

"Yes, sir."

"Give me your trombone."

Genuine Aspirin

Proved Safe

Take without Fear as Told

in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Tablets of Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds Headache
Nervitis Lumbago
Toothache Rheumatism
Neuralgia Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100.

Heft it Once!

Then You Will Want One for Your Own Kitchen

The very feel of it will make you want to own it. It balances so nicely, seems to be just right. The handle is rigid and does not tip around like a hinged handle. That means no slipping, scalded hands or accidents. See how you fill it? You lift the hinged lid and can fill it right under the tap or by dipper because the opening is at the side, not the centre. Most important, these new up-to-date kettles cost no more than the old fashioned kettle.

You Had Better

Help yourself than yelp to others
for help.

Be a little fellow going up than
a big fellow coming down.

Pin your faith to pluck than
waste your breath pursuing luck.

Be safe in selecting your invest-
ments than sorry for your folly.

Be a power in your community
than a perplexing problem for it.

Provide for your old age than
argue that the world owes you a
living.

Give your friend an occasional
bouquet along the way than a
hearsel on his funeral day.—Ex-
change.

chosen the far famed elastic drama,
"The passing of the Third Floor
Back", for reproduction in the near
future.

Bishop Jas. Meeks and his
daughter, Larue, from Raymond,
spent Thanksgiving Day at Glen-
wood, the guests of Mr. and Mrs.
Geo. Stringam.—Cardston News.

NOTICE

In the District Court of the
District of Lethbridge

IN THE MATTER of the Est-
ate of Jens Leslie Stevenson,
late of Raymond, in the Prov-
ince of Alberta, Soldier, deceased.

NOTICE IS HEREBY GIVEN
that all persons having claims up-
on the Estate of the above named

Jens Leslie Stevenson, who died
on the 6th day of October, A. D.,
1918, are required to file with Elsie
Marie Stevenson, of Raymond, in
the Province of Alberta, on or be-
fore the 2nd day of January A. D.,
1926, a full statement, duly ver-
ified, of their claims, or of any se-
curity held by them, and after
that date the Administratrix will
distribute the assets of the de-
ceased amongst the parties enti-
tled thereto, having regard only to
claims of which notice has been so
filed or of which have been
brought to her knowledge.

DATED at Lethbridge, in the
Province of Alberta, this 27th day
of November, A. D., 1925.

2nd Ward Program

Next Sunday evening in the 2nd
Ward church the Raymonds
Gleaners will furnish the entire
conjoint program as follows:

1 Chorus, "Gleaner Song", by
Gleaner Girls.
2 Talk on the Gleaner work by
Mary Wall.

3 Quartette by Miss D. Nurse
and company.

4 Piano duet by Misses Stella
King and Luella Mehew.

5 Reading by Miss Jones.

6 Saxophone solo by Miss Dor-
othy Strong.

7 Piano solo by Mrs. Alvin
Jones.

8 Playlet, "Ruth, the Gleaner."

9 Tableau of Gleaners.

This is the wish we ever wish.
A prayer we ever pray.

May the Gleaner Girls help
other lives.

They touch on life's highway.

Gleaner Girl Sheaves

Last Sunday evening in the 2nd
ward Gleaner class Mrs. Jas. B.

Walker gave an inspiring talk on
the following suggested sheaves to
be bound by the Gleaner Girls:

1 To control my temper.

2 To keep the Word of Wisdom.

3 To speak more quietly when
engaged in conversation.

4 To avoid criticizing others.

5 To make every boy friend
better through my association.

6 To express appreciation every
day.

7 To make our home happier
each day.

8 To assist my mother an extra
bit on Tuesday so that she can at-
tend Relief Society meeting.

9 To encourage my father to
attend his priesthood and sacra-
ment meetings.

10 To attend sacrament meeting
myself at least 50% of the time.

11 To assist some girl in our
